

INSTRUCTIONS FOR QUIZ & TEST CORRECTIONS

RE-WRITE. RE-THINK. RE-WORK.

Complete the test corrections to receive back 1/2 the points lost on the test. Look over your test carefully. Anywhere you didn't receive full credit means you made an error. Make sure you understand what your error is. If you do not understand your error, you need to come for extra help.

In order to receive this partial credit, you must complete the following item for each problem:

On your Test Corrections Worksheet:

1. **RE-WRITE** the problem, *yes*, ***write the actual problem***. Fill in the number of each question that you got wrong, along with the original problem on the test.
2. **RE-THINK** the questions that you answered incorrectly. First, identify your mistake and provide an explanation of how to make the correction in complete sentences. In other words, explain your mistake(s) and then the necessary corrections, and *yes*, ***write in complete sentences***.

Here are examples of what **NOT** to write:

- I read the problem wrong.
- I wrote down the wrong answer.
- I don't know.

Good explanations would look something like this:

- I did not follow the order of operations; I should have divided before I added.
- When you add two negative numbers you should keep the negative sign, but I made the number positive.

3. **RE-WORK** the problem for the correct answer. Solve the problem neatly, showing all of your work, and **CIRCLE** your new answer.

****In order to get credit, you must write out all of the work for each problem from beginning to end, NOT JUST what you did wrong on the test. You are proving to me, by showing all your work, that you now know how to get the right answer. ****

Turn in your original test with your Test Corrections. Staple your original test behind your Test Corrections.

REMEMBER: *The person most responsible for your learning is **YOU** and I am here to help you -- just ask. If you don't know how to fix your work, then you don't completely understand the process and you must seek help in order to adequately prepare for future tests. Please see me for help!*

MATH TEST CORRECTIONS / ERROR ANALYSIS WORKSHEET

Name: _____

Test Grade: _____

Test/Quiz Name: _____

Grade After Corrections: _____

Re-Write Original Problem In this column, copy the original problem from the test.	Re-Think Comments/Explanation In this column, write an explanation of what you did wrong and a comment that might help you in the future.	Re-Work Correction In this column, work the problem correctly, showing all work and circling your answer.
Example: Problem #4 $4(c - 2)$	I forgot to multiply 4×2 in my original answer. I had $4C-2$. I need to remember to use the distributive property and multiply the number outside the parenthesis to all the numbers inside the parenthesis	$4 \times C = 4C$ $4 \times 2 = 8$ (Solution: $4C-8$)
